Brad/Andrew – let's talk before we respond. I've discussed briefly with the state but we need to understand what they are comfortable with us releasing.

**Importance:** High

Andrew, all we received from MDNR is the figure from work plan (Tom may have more since he was out there observing those activities). Don't know when the MDNR results will be made available but again Tom may have some knowledge. We can also check on one of the pending state calls.

## **Request Description**

Short Description :

It appears MDNR is out collecting some kind of offsite field rad data, and plans to publish a report: Recent Activities Data collection for the West Lake Vicinity Report was conducted

during the week beginning November 1. The report, comprised of an interim report and the final laboratory analysis, will be available in the near future. <http://dnr.mo.gov/bridgeton/> We were never advised of these data collection efforts or the proposed report, and learned of it only by happenstance when Brian Power came upon some work being done by the MDNR Federal Facilities Unit and others. Can you please provide us information and the documents regarding this effort? I make the request under FOIA, but hope we can work more quickly and informally than that. The PRPs should have been apprised of this effort before it occurred, I should think, in order to offer to perform it, as the AOC provides, or at least to observe and split samples, especially if MDNR will seek the cost from them under the oversight agreement. This is a surprise and still a mystery to us. Thanks.
